
12v inverter drop shipping

How much voltage drop should an inverter have?

Most inverter manufacturers recommend a maximum of 5% voltage drop for the system-- typically 2.5% on either side of the inverter. On large systems, many designers specify an even tighter value of 3% total or less, to maximize the energy harvest.

What is a 12V inverter?

A 12V inverter is a device that converts 12V DC electric from your leisure batteries into the standardised AC current in your country of origin (120AC for the states, 240AC for the UK). It integrates into the electrical setup inside your campervan.

Is a 12V inverter's fan always on?

It depends on the specific inverter model. For instance, my Samlex SSW-1000W 12V inverter has two fans: one is always on, while the other turns on for loads of around 100W and above. Therefore, both fans are always on for this inverter.
