
35kw combiner box and inverter

What is a PV AC combiner box?

The new PV AC combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

How many string inverters can a combiner box collect?

The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet. They withstand ambient temperatures from -20 up to +50°C to operate in hardest climate conditions, fulfilling the highest market standards as per IEC 61439-2 ed 3.0:2020.

What is a solar combiner box?

Solar combiner boxes are essential components in solar photovoltaic (PV) systems, designed to consolidate the outputs of multiple solar panel strings into a single output for connection to an inverter. There are various types of combiner boxes tailored to meet specific needs and configurations in solar installations. Here are the primary types:
