How much does a 5kw solar & battery system cost?

A 5kW solar & battery system costs around £12,138 to buy and install. This includes 11 solar panels, all with a 450-watt peak power rating, as well as a 5kWh battery. This final cost can vary substantially though, based on factors including where you live, the type of roof you have, the installer you choose, and the current state of the industry.

What is a 5kw solar panel system?

A 5kW solar panel system has a peak output rating of five kilowatts, meaning it produces 5,000 kilowatt-hours (kWh) of electricity per year in standard test conditions. You can construct a 5kW system by acquiring solar panels with power ratings that add up to 5,000 watts (W) when grouped together.

Is a 5kw Solar System enough?

A 5kW solar panel system is usually more than enough for a household that uses the average amount of electricity in the UK, which is 3,400kWh. In the table below, you can see the minimum system size we'd recommend for different electricity consumption levels, based on the idea that it's better for your output to exceed your usage.

How much power does a 5kw Solar System produce?

A 5kW solar panel system in the UK will produce an annual output of around 4,250kWh, if it's dealing with average UK irradiance. This equates to your system producing roughly 85% of its peak power output - but these figures vary significantly, depending on where you live.
