[Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

What is 5G deployment & adoption in ASEAN?

3.2. 5G Deployment and Adoption in ASEAN 3.2.1. Salient issues in 5G deployment As countries strive to drive digital transformation for economic growth and competitiveness through emerging critical technologies, 5G, coupled with AI, is becoming a transformative force, fostering efficiency, innovation, and disruptive creativity.

Does ASEAN have a 5G network?

The majority of ASEAN member states complete full deployment of 5G standalone (SA) networks. Governments implement AI-driven solutions for network automation, spectrum management, and cybersecurity. ASEAN introduces a unified regional governance framework for AI and 5G technologies.

This study aims to generate robust policy insights to support 5G development in ASEAN countries--particularly in the context of the rapid convergence of mobile technologies ...

Learn how 5G adoption is progressing across Asia Pacific, including which countries lead in 5G download speeds and Availability.
