
Automatic Rainfall Station Battery

CAWS100 Automatic Rainfall Station has widely launched in several application areas such as meteorology, hydrology, agriculture, and environment protection, etc. ...

The iMet-4200 automatic rainfall station records accumulated rain fall with a tipping bucket and transmits the data at user defined intervals through a GSM/GPRS modem. The ARS is of a very rugged design to allow for ...

The iMet-4200 automatic rainfall station records accumulated rain fall with a tipping bucket and transmits the data at user defined intervals through a GSM/GPRS modem. The ARS is of a ...

The rainfall monitoring station uses solar power supply system, built-in large capacity battery/maintenance-free, and supports 4G signals of China Telecom, China Unicom and China Mobile.

Brief introduction: DSS1 automatic rainfall station, by including: SRY - 1 rain gauge, data collector, solar pv panels, solar power controller, storage battery, GPRS wireless data transmitter. DSS1 ...

Automatic Rain Gauge Station having the industrial grade micro controller datalogger ensure the reliability, accuracy and continuous performance in the toughest weather condition. BHM make ...

The rainfall monitoring station uses solar power supply system, built-in large capacity battery/maintenance-free, and supports 4G signals of China Telecom, China Unicom and ...

automatic weather station with integrated rain gauge plays a key role in modern meteorological observation with its high precision, high reliability and intelligent features. It ...
