
Baghdad 2025 hybrid energy 5g base station construction bidding

What is the Baghdad Metro project?

The Baghdad Metro project has been under discussion for decades. Originally proposed in the 1980s, it was repeatedly shelved due to war, political instability, and international sanctions. Once completed, it will be the first of its kind in Iraq. The metro would span 148 kilometres (92 miles) and include seven lines and 64 stations.

When will the Baghdad Metro be built?

In December 2022, the Baghdad Metro project received a significant boost with its inclusion in the 2023 Ministry of Transport budget. Set to encompass 14 stations and spanning 31 kilometers in length, the metro's construction is slated to commence in either 2023 or 2024, with further announcements expected in the fourth quarter of 2024.

Who is interested in the Baghdad Metro project?

The interest in the Baghdad Metro project extends beyond borders, with 26 multinational corporations from countries such as China, India, Germany, Italy, Spain, and Qatar expressing keen interest in participating in the project's execution, highlighting its global significance and appeal.

Is Iraq's new Metro a "vital and strategic project"?

Mohammed al-Najjar, advisor to Prime Minister Mohammed Shia al-Sudani, told the Iraqi News Agency (INA) that the metro is "a vital and strategic project that has been long awaited". He said construction will begin with one line and expand in phases, following a comprehensive plan developed by a newly established project management body.
