# Batteries as outdoor power source

All articles published in Batteries (ISSN 2313-0105) are published in full open access. An article processing charge (APC) of CHF 2700 (Swiss francs) applies to papers accepted after peer ...

Batteries requires that authors publish all experimental controls and make full datasets available where possible (see the guidelines on Supplementary Materials and references to unpublished ...

Anode-less sodium metal batteries have drawn dramatic attention owing to their high specific energy and low cost. However, the growth of sodium dendrites and the resulting ...

Batteries, Volume 9, Issue 1 (January 2023) - 64 articles Cover Story (view full-size image): Cylindrical 18650 and 21700 lithium-ion batteries are produced with small gaps between the ...

Batteries Batteries is an international, peer-reviewed, open access journal on battery technology and materials published monthly online by MDPI. The International Society for Porous Media ...

The rising demand for sustainable energy storage has fueled the development of green batteries as alternatives to conventional systems. However, a major research gap lies in ...

The global shift towards sustainability is driving the electrification of transportation and the adoption of clean energy storage solutions, moving away from internal combustion engines. ...

Lithium-ion batteries (LIBs) are an indispensable power source for electric vehicles, portable electronics, and renewable energy storage systems due to their high energy density ...
