## Communications investment in 5g base stations

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

Which companies are partnering with 5G in 2025?

January 2025: Nokia secured a USD 2.3 billion contract with Bharti Airtel for 5G radio access across 17 Indian states. December 2024: Ericsson announced a partnership with Microsoft to pair Azure Edge Zones with 5G base stations for ultra-low-latency industrial use cases.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

The 5G base station is a fixed communication equipment that connects using a single or several antennas. It includes a wireless receiver and a small-range transceiver with ...
