
Cooling device for grid-connected inverter of solar container communication station

As #climate change intensifies heatwaves, #cities are experimenting with cooling techniques and initiatives, including urban greening and categorization.

Top nature and climate news: Rooftop solar study reveals its climate cooling potential; US pulls out of climate damage fund; Global sea ice hits record low.

Emissions from the refrigerants, air conditioners and energy used in the cooling industry account for 7% of global greenhouse gas emissions, and are expected to triple ...

Extreme heat, drought and other climate hazards could raise cumulative annual running costs at data centres in operation today by \$3.3 trillion by 2055.

Data centres are responsible for 1% of energy-related greenhouse gas emissions. Here's how to cut those emissions and still deliver on the promise of AI.

A key reason for the high-water consumption is limited water reuse in cooling. During the cooling process, part of the freshwater evaporates, and the remaining water ...

Sustainable cooling targets efficiency improvements to cooling solutions alongside measures that lower ambient temperatures in buildings and urban environments.

India's cooling challenge India faces a daunting problem: how to provide access to cooling to its citizens without warming the planet. India has among the most cooling degree ...
