
Energy storage charging station in Hanoi

Which EV charging company has opened the largest fast-charging station in Vietnam?

Vingroup's in-house EV charging solutions provider, V-Green, has opened the largest fast-charging station in Hanoi, Vietnam. The company established this facility as part of a major expansion drive across the national capital.

How many EV chargers will VinFast install in Hanoi?

According to an earlier announcement, VinFast planned to install 132 units of 120 kW DC chargers and five units of 60 kW DC chargers across Hanoi last month. V-Green indicated that most of these DC chargers, if not all, would have two charging guns and thus allow up to 262 users to charge their EVs at once.

Will Hanoi's new EV charging station improve access to EV drivers?

Strategically located at one of Hanoi's key entry points, this facility should significantly improve accessibility for EV drivers travelling to and from the capital. The new fast-charging station hosts 42 units of 120 kW DC chargers, each with two charging guns, allowing up to 84 EVs to charge simultaneously.

Should Vietnam invest in EV charging infrastructure?

Likewise, Thang also proposed incentives such as low-interest loans and grace periods to mitigate risks and attract more investment in charging infrastructure. Vietnam's underdeveloped charging network remains a major bottleneck in the country's EV journey. Experts suggested government agencies, automakers, and investors share the responsibilities.
