
Huawei promotes liquid cooling energy storage

What is Huawei's new smart hybrid cooling energy storage solution?

Huawei has recently introduced the industry's first commercial new smart Hybrid cooling energy storage solution in Europe. It comes with several benefits and offers a circulation efficiency of 91.3% alongside a reliable user experience. On April 8, 2025, Huawei hosted a FusionSolar Industrial and Commercial Flagship Summit in Frankfurt, Germany.

How does Huawei full liquid cooling cabinet work?

The Huawei full liquid cooling cabinet is designed with a fully enclosed structure, which allows all heat to be removed from the cabinet through chilled water. Dissipates heat for IT cabinets. The Huawei full liquid cooling cabinet can remove all the heat from the cabinet through chilled water. Therefore, most air conditioners can be removed.

What is a hybrid cooling energy storage system?

This has eventually established a new industry milestone in the six most critical standards for evaluating energy storage systems. A hybrid cooling energy storage system offers a 91.3% circulation efficiency. It has a unique pack optimizer with 100% DOD (depth of discharge) and a unique heat dissipation technology with 2% higher SOH.

What happened at Huawei fusionsolar 2025?

On April 8, 2025, Huawei hosted a FusionSolar Industrial and Commercial Flagship Summit in Frankfurt, Germany. The theme was Future Energy Goals. Tong Jinly, the President of Huawei Digital Energy Global Industrial and Commercial Sales and Services, unveiled a new smart Hybrid cooling energy storage solution in Europe.

Huawei Digital Power has launched the FusionSolar C& I LUNA2000-215-2S10 Energy Storage System, designed to meet the dynamic demands of the commercial and industrial (C& I) energy storage sector ...

Huawei unveiled the world's first wind-liquid intelligent cooling industrial and commercial energy storage flagship product, which is full of black technology, realizing ...

Huawei's new generation 215kWh wind-liquid intelligent cooling energy storage, along with Huawei's 150kW higher power inverter and supercharging technology, together ...

Huawei FusionSolar introduces an industry-first hybrid C& I energy storage system that uses novel smart air and liquid cooling systems

Full Liquid Cooling Makes Data Centers More Energy-efficient AI applications, high-performance computing, and GPU servers have driven the power consumption of a data center rack as high as 20 kW, 30 kW, or ...

hybrid air- and liquid-cooled C& I energy storage system (ESS), which it highlighted sets a new benchmark for efficiency and performance.

Huawei has recently introduced the industry's first commercial new smart Hybrid cooling energy storage solution in Europe. It comes with several benefits and offers a circulation efficiency of 91.3% alongside a ...

Huawei Digital Power has launched the FusionSolar C& I LUNA2000-215-2S10 Energy Storage System, designed to meet the dynamic demands of the commercial and ...
