
Hybrid Government Procurement of Photovoltaic Containers

How to promote competitive procurement of electricity from solar PV power plants?
Promoting competitive procurement of electricity from solar PV power plants, by Distribution Licensees. Facilitating solar PV capacity addition and fulfilment of Renewable Purchase Obligation (RPO) and Energy Storage Obligation (ESO) requirement of DISCOMs.

Are hybrid PPAs a viable solution for co-located solar and storage?

Hybrid PPAs are an emerging solution to the challenge of maximising the commercial value of co-located solar and storage. Image: Business Wire. The co-location of renewable generation and energy storage demands new contractual arrangements to make such projects commercially viable.

Are hybrid solar projects outperforming stand-alone solar projects?

One signal is that the volume of hybrid solar projects seeking approval substantially outgrew that of stand-alone projects (according to Pexapark research, these figures stood at 3.4GW and 921MW respectively, as of Q1 2023).

Are hybrid PPAs a good solution for power infrastructure deals?

Jack Rankin, Miguel Valderrama and Brian Knowles of Pexapark explore how hybrid PPAs are becoming a favoured solution for structuring deals that capture the full value of both assets. In the world of power infrastructure, we may broadly define "co-located" assets as those that share a single connection to the grid.

Federal Aggregated Solar Procurement Project
USDA Agricultural Research Services, Davis, California
USDA Agricultural Research Services, Fort Collins, Colorado
Berkeley Lab provided technical expertise and support to the U.S. General Services Administration (GSA) in executing the federal government's first ever joint solar power procurement. The project combined multiple small to mid-size solar PV installations at several federal agencies' sites in a single procurement with one solar firm. All together, n...
