How do I install a roof-integrated solar panel?

Roof-integrated solar panel installation is a simple process with Marley SolarTile®; - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

What is the new way to replace tiles for solar installation?

The new, better way: Double-flashed tile replacements that perfectly fit in place of a single tile. Replacing small sections of tile with composite shingles, installing mounts meant for composite shingle roofs, and placing dummy tiles over the holes. Cutting or drilling into tiles to attach hooks under them that support solar racks.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.
