
Investment in energy storage power stations in various parts of Dhaka

Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

What's in the Bangladesh Power Sector Roadmap?

The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.

How does the power sector support transport in Bangla-Desh?

The power sector continues to support the ongoing electrification of transport in Bangla-desh, through various initiatives undertaken by distribution companies and the roll-out of an EV charging tariff.

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangla-desh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.
