
Manila solar Glass Greenhouse

How many greenhouse projects has Harbest installed in the Philippines?

Since 2002, Harbest has been trusted with installing over 2,500 greenhouse projects all over the Philippines.

What is a greenhouse integrated PV (GIPV) module?

Get in touch! Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.

What is a Maligaya greenhouse?

Our smallest standard greenhouse design, the Maligaya is an ideal structure for a vegetable seedling nursery, or for 2 beds of vertical farmed high-value crops. Recommended as a starter greenhouse for those who wish to familiarize themselves with greenhouse farming, or for those who wish to have a protected nursery for their seedlings.

What is a Netanya greenhouse?

Our biggest standard greenhouse design, the Netanya is inspired by Israeli greenhouses built to allow farming even in harsh desert conditions.

Since 2002, Harbest has been trusted with installing over 2,500 greenhouse projects all over the Philippines. Our greenhouses are inspired by Taiwanese and Israeli designs, combining ...

Glass Types (Extra Clear, Clear, Tinted, Low emissivity) Glass Shape and Thickness Heat Strengthened, Tempered, Laminated, Double Glazed Cells Positioning In addition to ...

Glass Types (Extra Clear, Clear, Tinted, Low emissivity) Glass Shape and Thickness Heat Strengthened, Tempered, Laminated, Double Glazed Cells Positioning In addition to generating solar energy Active Glass can also ...

The type roof structure has the advantages of strong wind unloading capacity and large displacement, which is suitable for wind and rainfall areas. 2) The steel structure of greenhouse uses hot dip galvanized pipes and profiles, ...

This greenhouse features a top covered with hollow solar panels and walls covered with hollow glass, combining the aesthetic appeal of glass greenhouses with the thermal insulation ...

Philippines Glass Greenhouse Market Overview The adoption of glass greenhouses in the Philippines is increasing as agricultural practices shift toward more sustainable and controlled ...

Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses,

Heliene's Greenhouse Integrated PV ...

Energy Glass Solar(TM) Nanotechnology, used with glass, fiberglass, plastic or plexiglass, reduces the initial cost of a greenhouse by at least 30% via incentives and tax credits, and saves on the yearly cost of ...
