# Moldova household energy storage requirements

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

What is Moldova's energy package?

This package has been mandatory for transposition into Moldovan legislation since 2022, as part of Moldova's commitments as a contracting party to the Energy Community Treaty. Its adoption will support the greater integration of Moldova's electricity market into the European market.

Will Moldova's electricity market be integrated into the European market?

Its adoption will support the greater integration of Moldova's electricity market into the European market. As the author of the draft law, the Ministry of Energy has proposed several specific objectives aimed at supporting the development of energy infrastructure and promoting competition in the electricity market:

How much energy does Moldova need in 2023?

This means that in summer CHPs are off, and the imports from Transnistria meet about 90% of the total domestic electricity demand. Committed renewable energy capacity in the Republic of Moldova by 2030 is expected to reach 700MW. In 2023, renewable energy generation met 10.5% of the energy demand, compared to 5.5% in 2022.
