# Myanmar backup power storage investment

How can Myanmar save energy?

Future savings in energy could be due to savings in primary energy supply in the residential, commercial, transportation, and industrial sectors. In this regard, Myanmar implemented a range of energy efficiency and conservation goals and action plans that target energy savings in all sectors.

Does Solis have an off-grid battery energy storage system in Myanmar?

Solar tech leader Solis is making waves in Southeast Asia with its new energy solution -- an off-grid Battery Energy Storage System (BESS) in Myanmar.

Who manages Myanmar's energy sector?

Myanmar's energy sector is managed by the Ministry of Electric Power (MOEP) and the Ministry of Energy (MOE), which together account for over one-third of public sector revenue. Before May 2022, the two ministries operated under one single Ministry of Electricity and Energy (MOEE).

What is the energy demand supply situation in Myanmar?

The Myanmar energy demand supply situation indicates that power generation mix must shift to more coal and hydropower, continued use of biomass, natural gas consumption, and appropriate increase of renewable energy such as solar PV and wind power generation.

Unstable grids threaten solar factory profits. Discover the best backup power solutions, comparing diesel generators vs. BESS to ensure continuous production.

Myanmar saw the completion of a 50 kW hybrid solar project by Solis with Longlast batteries, boosting commercial backup and energy resilience.

MYANMAR is a new and emerging tourist destination in South East Asia. Known to most travelers as the Golden land, Myanmar is rich in cultures and natural attractions. There are numerous ...
