
New Energy Storage in Bergen Norway

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

Is Norway a battery region?

As a battery region, the Nordics have become a notable actor in the broader European battery market. They have also joined forces on global projects, such as the export of energy storage systems to Egypt and Lebanon. "The rest of the world understands that Norway is an important player in all things battery.

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial ...

Summary: As Norway accelerates its renewable energy transition, the proposed Bergen Energy Storage Power Station has become a focal point for industry observers. This ...

TotalEnergies, Equinor and Shell have completed the carbon dioxide (CO₂) receiving and storage facilities at the Northern Lights joint venture (JV) in Yngarden, Norway. ...

On 26 September the Norwegian Minister of Energy conducts the official opening of the Northern Lights CO₂ transport and storage facility in Yngarden, near Bergen. The ...

TotalEnergies, Equinor and Shell have completed the carbon dioxide (CO₂) receiving and storage facilities at the Northern Lights joint venture (JV) in Yngarden, Norway. The Norwegian Minister of Energy ...

Geir Bjerkeli, CEO of Corvus Energy, addresses the 450 guests at the opening ceremonies of the new Corvus battery factory in Bergen, Norway. -- Photo courtesy Corvus Energy Corvus ...

On 26 September the Norwegian Minister of Energy conducts the official opening of the Northern Lights CO₂ transport and storage facility in σ ygarden, near Bergen. The Northern Lights facility is a joint venture ...

General - Storage System Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the deep sea to deliver electricity on demand. This ...
