
New energy storage installed capacity

What is the future of energy storage in China?

The new energy storage market in China has great development potential in the future. The cumulative installed capacity of new energy storage in China is expected to exceed 100 gigawatts (GW) by 2025, according to the Energy Storage Industry Research White Paper 2025 released by the Institute of Engineering Thermophysics on 10 April.

Will China's new energy storage sector grow in 2024?

BEIJING, Jan. 24 -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy Administration (NEA).

How big is China's energy storage capacity?

The cumulative installed capacity of new energy storage in China is expected to exceed 100 gigawatts (GW) by 2025, according to the Energy Storage Industry Research White Paper 2025 released by the Institute of Engineering Thermophysics on 10 April. The capacity is likely to surpass 200GW by 2030, more than double the 2024 level of 73.76GW.

How big is China's energy storage capacity in 2024?

Bian Guangqi, deputy director-general of the NEA's energy saving and technology equipment department, said that by the end of 2024, total installed capacity of new energy storage projects in China reached 73.76 million kW, which represented an increase of over 130 percent compared to the end of 2023.

China's installed energy storage capacity reached 164 GW by June 2025, according to the China Energy Storage Alliance (CNESA). More than 100 GW came from new ...

China's National Energy Administration (NEA) announced on January 23 that the country's installed capacity of new energy storage had surged to 73.76 GW/168 GWh by the end of 2024, marking a twentyfold ...

China's nationwide installed capacity of new-type energy storage has exceeded 100 GW, more than 30 times the level at the end of the 13th Five-Year Plan period.

China's new energy storage sector saw rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy Administration.

Steady and Rapid Growth of New-Type Energy Storage in H1 2025 Installed Capacity By the end of the first half of 2025, China's new-type energy storage had maintained ...

China's National Energy Administration (NEA) announced on January 23 that the country's installed capacity of new energy storage had surged to 73.76 GW/168 GWh by the ...

The new energy storage market in China has great development potential in the future. The

cumulative installed capacity of new energy storage in China is expected to exceed ...

In a recent announcement, the National Energy Administration (NEA) said that the new energy storage in China has achieved a milestone in 2024, with the rise in the installed ...
