
North Macedonia is a solar panel manufacturer

Can North Macedonia develop solar energy?

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth.

How much solar power does Macedonia have in 2022?

By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years. In 2023 alone, North Macedonia saw an impressive increase in solar capacity, with new installations contributing to a total increase of 251% compared to the previous year.

Why does North Macedonia import electricity?

This shift can be largely attributed to increased investments in photovoltaic projects, which have bolstered local electricity production. Currently, North Macedonia imports electricity primarily from neighboring countries such as Bulgaria, Serbia, Hungary, and Greece.

In Bulgarian In Macedonian In Romanian In Serbian One of the largest manufacturers of solar panels worldwide - the German group AE Solar will build its first plant in ...

Discover why North Macedonia is a prime export hub for solar module manufacturing. Gain tariff-free EU access, strategic logistics, and a competitive edge.

Find out more in our daily focus, 15-18 September. North Macedonia offers strong growth potential for renewable energy. Favourable geography and climate support both solar ...
