
Photovoltaic Energy Storage Container Hybrid Cooperation

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and ...

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the ...

EU countries can work together to achieve their clean energy targets through the renewable energy financing mechanism.

Solar energy also creates jobs directly. The workforce of the photovoltaic sector grew by 27% to 826 000 by the end of 2023, up from 648 100 workers in 2022. This rapid growth means that ...

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

Nearly-zero energy buildings, is a requirement introduced by the Energy Performance of Buildings Directive EU/31/2010 (revised in 2018). It means that all new buildings - as of 2020 - must ...

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...
