
Photovoltaic folding containers with ultra-large capacity are most suitable

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...

ABSTRACT: The last calls of the EU 7th Framework Programme for research have been already published. About EUR 195 million have been invested in research and ...

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

Solar energy also creates jobs directly. The workforce of the photovoltaic sector grew by 27% to 826 000 by the end of 2023, up from 648 100 workers in 2022. This rapid growth means that ...

EU countries can work together to achieve their clean energy targets through the renewable energy financing mechanism.

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and ...

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the ...
