
Power station where generators arrive in Bosnia

Will Bosnia and Herzegovina build a new hydropower plant?

As well as new coal capacity, Bosnia and Herzegovina plans a large amount of new hydropower, which is proving even more controversial than the coal plants. In the last decade, more than 100 small hydropower plants have been built, causing widespread public resistance in places like Fojnica, Kruscica and on the Neretvica and Buna.

Is Bosnia and Herzegovina a net exporter of electricity?

Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity- the only one in the Western Balkans. More than half of its electricity generation capacity is made up of hydropower, while the remainder is made up of five lignite power plants.

Does Bosnia & Herzegovina use fossil gas?

Bosnia and Herzegovina does not have its own fossil gas extraction and has a very low level of gas dependence - less than 3 per cent of total energy supply in 2022. In the Federation of BiH entity, it is mostly used for heating in Sarajevo.

Should Bosnia and Herzegovina use more energy?

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.
