## Price of a single solar greenhouse in China and Africa

What is a Chinese solar greenhouse?

Chinese solar greenhouses are unique facility agriculture buildings, widely used in northeastern China, and provide a favorable requirement for crop growth. The north wall configurations play an essential role in heat storage and thermal insulation and directly affect the management of the internal environment.

What is the cost of a solar greenhouse?

A solar greenhouse is the most expensive type of greenhouse to install, with an average cost of between \$35 and \$45 per square foot. For example, a small 50-square-foot greenhouse would likely cost around \$2000, while a larger one can easily exceed \$10,000.

How much does a solar system cost in China?

Component Checklist: Solar systems in China offer exceptional value at 40-60% lower costs than Western markets. Quality systems start at \$15,000 (\$2,100) with 6-8 year payback periods. This article will take you through solar system price in China: how much does it really cost, but the quality varies greatly by supplier and system type.

Are solar greenhouses the future of food production in China?

The Chinese government's incentive program has made the solar greenhouse a cornerstone of food production in central and northern China. Solar greenhouses now make up a fifth of the total area covered by greenhouses in China, and they're expected to cover at least 3.7 million acres by 2020. The first Chinese-style greenhouse was built in 1978.
