## Price of high-efficiency solar modules in Jibu

How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.

How much will PV modules cost in 2025?

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W (US\$0.1/W), and some modules priced as high as RMB0.75/W (US\$0.11/W).

How much does photovoltaic cost in China?

The data is categorized under China Premium Database's Energy Sector - Table CN.RBN: Photovoltaic: Price. CN: Price: Photovoltaic Module: 182 Single Crystal data was reported at 0.660 RMB/W in Apr 2025. This records an increase from the previous number of 0.650 RMB/W for Mar 2025.

Why do solar modules cost so much?

However, as the primary cost component of photovoltaic modules, the price of solar cells plays a decisive role in module pricing. Due to the oversupply of polysilicon in earlier periods, prices have been under sustained pressure since 2023, even falling below cost levels in the first half of 2024.

Product Details: Chinese solar module prices held steady at \$0.115/W for TOPCon modules and \$0.105/W for mono PERC modules. Market activity is subdued with few buyers, mostly bargain ...

The latest edition of our TOP SOLAR MODULES list, compiled in early June 2025, consists of 51 high-efficiency modules from 33 manufacturers. This month's update features 6 ...

The modules must be based on monocrystalline silicon, one of the primary solar panel raw materials known for its high efficiency. The accepted technologies include PERC, ...

China's latest tender results show the spot price of n-type modules increasing from RMB0.7/W to as much as RMB0.75/W.

Due to cost pressures and policy drivers, module prices may attempt a moderate rise next week, but weak demand and high inventory levels will likely cap the increase.

CN: Price: Photovoltaic Module: 158 Single Crystal data is updated monthly, averaging 1.755 RMB/W from May 2021 (Median) to Aug 2024, with 40 observations. The data ...

---

In conclusion, photovoltaic modules prices are expected to remain in a low adjustment phase during 2025-2026. However, the likelihood of significant price drops is ...

To comprehensively address the user's query about the solar module price trend, I need information on the latest price statistics, historical price trends, factors influencing price ...
