# The latest approval for wind and solar energy storage

What does a shortened approval process mean for solar?

Sandra is News Director of pv magazine Deutschland. She has been reporting on solar since 2008. Acceleration areas and shortened approval procedures are intended to ensure faster expansion of wind and solar parks as well as energy storage at the same locations. The move implements requirements from the EU Renewable Energy Directive of 2023.

Is a short path ahead for wind & solar projects?

A short path still exists for wind and solar projects to access these credits, but it will not be an easy road ahead for most developers. BloombergNEF's revised outlook now projects a 23% drop in new wind, solar and energy storage additions through 2030 versus the 1H 2025 base case. Technologies fare differently within this decline.

Will trump approve solar or wind power projects?

President Donald Trump has stated that his administration will not approve solar or wind power projects. This announcement comes despite increasing electricity demand in some parts of the U.S. A wind farm near Palm Springs, California, is shown here on March 6, 2024.

How have new federal actions impacted wind & solar projects?

In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk. ECT's experts have analyzed these developments and outlined key takeaways to help you stay on track. Facing delays or need guidance navigating these shifts?

Acceleration areas and shortened approval procedures are intended to ensure faster expansion of wind and solar parks as well as energy storage at the same locations.
