# The latest integrated energy storage solution in New York USA

Can energy storage solutions deliver more reliable electricity to New York communities? NYSERDA President and CEO Doreen M. Harris said, "The possibilities created by innovative energy storage solutions can safely deliver more reliable electricity to New York communities as part of building an affordable and resilient zero-emission future."

What is New York State Energy Research & Development Authority (NYSERDA)? The New York State Energy Research and Development Authority (NYSERDA) today announced over \$5 million is now available to support innovative energy storage technologies in New York that can harness and provide stored energy to New York's electric grid.

What is long duration energy storage? NY-BEST Executive Director Dr. William Acker said, "Long Duration Energy Storage and other innovative energy storage technologies will provide critical services to the electrical grid supporting reliability, infrastructure efficiency reducing cost, and enabling our clean energy goals."

What is New York State's Innovation & Research Program? New York State's investments in research, development, and commercialization support innovators accelerating the clean energy transition to economy-wide carbon neutrality. NYSERDA's Innovation and Research (I&R) program is deploying approximately \$1.2 billion over 15 years as direct research investments and commercialization support.

The Project is expected to be eligible for incentives under the New York State Energy Research and Development Authority ("NYSERDA") NY-Sun Program and the Retail ...

CVE North America has taken a significant step towards promoting renewable energy by initiating construction on its first solar and battery energy storage system (BESS) in ...

The state's energy research entity has removed the word "renewable" from its innovation fund and made more than \$5 million available for new long-duration energy storage ...

Inlyte Energy's iron-sodium battery storage system just passed a key factory test with a large US utility in attendance.

--Clean Energy Technologies, Inc., a clean energy technology company delivering scalable solutions in power generation, storage, waste-to-energy, and heat-to-power, today ...

Houston, TX - August 8, 2024 - Catalyze, a fully integrated developer and Independent Power Producer (IPP) of distributed renewable energy assets, today announced the launch of its first ...

---

A new, large scale iron-sodium energy storage system will be manufactured in the US, helping to support more wind and solar in the grid.

The New York State Energy Research and Development Authority (NYSERDA) today announced over \$5 million is now available to support innovative energy storage ...
