
The process of replacing lithium batteries in Spain's outdoor communication battery cabinet

What is happening in Spain's lithium-ion battery market?

The Spain lithium-ion battery market is entering a new stage of rapid development. The Zaragoza plant of global automotive giant Stellantis is partnering with CATL, the world's largest EV battery manufacturer, to expand electric vehicle production and build a large-scale battery manufacturing facility in Spain.

How is Spain reusing lithium batteries?

Spain has just taken the first step towards recycling lithium batteries. This move complies with the European regulations that, since last year, have made it compulsory to treat this waste and reuse it as much as possible. Endesa and Urbaser joined forces two years ago to announce the creation of a company dedicated to this task, Novolitio.

Will Spain be a leader in Europe's Lithium-ion battery industry?

Although Stellantis has not yet made a final decision, the Spanish government is actively pushing forward the project, aiming to anchor Spain as a strategic leader in the Europe lithium-ion battery industry. A Stellantis spokesperson confirmed that the project remains subject to regulatory approval but welcomed the government's support. 2.

Will CATL and Stellantis reshape Europe's Lithium-ion battery market?

If finalized, the joint venture between CATL and Stellantis in Spain will reshape the Spain lithium-ion battery market, further integrating the European EV ecosystem. For CATL, this would add another overseas plant to its growing global footprint.

In just a few simple steps, battery swapping can be done quickly at battery swapping stations throughout the city, achieving seamless battery life and making every trip more convenient and efficient.

Now, they have announced that the first phase of recycling activity, the collection and compilation of lithium batteries, has begun.

Stellantis and CATL (Contemporary Amperex Technology Co., Ltd.) announced they have reached an agreement to invest up to EUR4.1 billion to form a joint venture that will build a large-scale European...

Once operational, the factory will produce LFP batteries for a range of Stellantis brands, reinforcing Spain's competitiveness in the European EV supply chain.

This move signifies CATL's third significant battery factory in Europe and its inaugural facility solely dedicated to manufacturing lithium iron phosphate batteries.

This joint venture will enhance Stellantis' LFP battery offerings in Europe, enabling the automaker to deliver high-quality, durable, and affordable electric vehicles, including ...
