## US Energy Storage Power Supply Purchase EK

Will US energy storage industry invest \$100 billion in batteries?

Courtesy of Salt River Project The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and company representatives said Tuesday.

Will US-made batteries meet 100 per cent of energy storage demand?

On Tuesday, American Clean Power, the clean energy industry trade group, announced a \$100bn commitment on behalf of the energy storage industry to manufacture and buy US-made batteries with the aim of meeting 100 per cent of domestic energy storage demand by 2030.

What does ACP's \$100 billion commitment to domestic energy storage look like?

The industry's \$100 billion commitment to support domestic energy storage production "demonstrate [s] what success can look like," ACP CEO Jason Grumet said in the briefing. Right now, he added, many industry players are in a holding pattern until more clarity develops around tax and trade policy.

Will America supply 100% of energy storage projects with American-made batteries?

The commitment "represents a clear pathway to supplying 100% of U.S. energy storage projects with American-made batteries by 2030," but depends on a "streamlined permitting environment" and predictable tax and trade policy, ACP said.
