# Wellington Energy Storage Container Procurement Project

What is the Wellington Battery energy storage system?

The structure will hold instruments to measure wind speed, direction and other atmospheric conditions to assess the site's suitability for a wind farm. The Wellington Battery Energy Storage System consists of a battery energy storage system with a capacity of 500 megawatts and up to two hours of storage.

What are the benefits of the Wellington Bess project?

In operation, the Wellington BESS will be one of the largest in the state, capable of contributing up to 1,000 MWh of storage capacity in the NEM. The project will also provide benefits in the form of smoothing out energy spot prices and providing back-up power during network interruptions.

Does Ampyr own the Wellington Bess project?

Ampyr now owns 100% of the 400MW Wellington BESS project in New South Wales. Ampyr Australia has acquired Shell's 50% stake in the 300MW Wellington battery energy storage system (BESS) in New South Wales. With its Wellington BESS stage two project (100MW), Ampyr now owns 100% of the 1000MWh Wellington project.

Who owns the Wellington Bess project?

With its Wellington BESS stage two project (100MW), Ampyr now owns 100% of the 1000MWh Wellington project. Ampyr and Shell Energy Australia had been joint venture partners in the BESS scheme (image of site) since October 2022. Ampyr is aiming for energisation of stage one in 2026, with stage two to follow in 2027.

A mega-battery project in NSW is moving ahead. Construction is set to begin on the first stage of the Wellington Battery Energy Storage System [BESS] in Central West NSW. The advance follows the ...

Fluence Chosen for 300 MW / 600 MWh Wellington Battery Energy Storage System for AMPYR Australia Julian Nebreda, President and Chief Executive Officer, Fluence, and Alex ...

The project incorporates a large-scale battery energy storage system (BESS) with a discharge capacity of 500 megawatts (MW) and a storage capacity of 1,000 megawatt hours ...

A mega-battery project in NSW is moving ahead. Construction is set to begin on the first stage of the Wellington Battery Energy Storage System [BESS] in Central West NSW. The ...

Ampyr Australia has acquired Shell's 50% stake in the 300MW Wellington battery energy storage system (BESS) in New South Wales. With its Wellington BESS stage two ...

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a ...

---

CentrePort's Energy Transition CentrePort has already made great strides with its energy transition in a relatively short period of time, with its 100% electric port trucks and associated battery management system, ...

The Wellington Battery Energy Storage System consists of a battery energy storage system with a capacity of 500 megawatts and up to two hours of storage.
