# Which company in Georgia makes energy storage power supply

Does Georgia Power have a battery energy storage system?

Georgia Power is already operating battery energy storage systems and has plans for more. The utility's 65-MW Mossy Branch BESS is located in Talbot County and began commercial operation in November 2024. Another 765 MW was authorized by the Georgia PSC and is projected to enter commercial operation in 2026, the utility said.

How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility said Tuesday. A draft request for proposals specifies the resources should be online in 2028 at the earliest and no later than the end of 2031.

What is mossy branch battery energy storage system?

US utility Georgia Power has brought online its 65-MW/260-MWh Mossy Branch battery energy storage system (BESS), which is expected to improve the resilience of Georgia's electric grid. Located near Columbus, in Talbot County, the BESS will be operated as a standalone unit.

Is Georgia Power planning a 265 MW battery storage project?

Currently, Georgia Power is working on a 265-MW battery storage project, which it plans to commission by end-2026. A few months ago, it picked the locations for four BESS projects with a total capacity of 500 MW.
